Table 1.1: Logic functions in Numpy

---

`np.allclose`

---

## Chapter 2

# Numpy 中的函数

### 2.1 Logic functions

#### 2.1.1 np.allclose

```
numpy.allclose(a, b, rtol=1e-05, atol=1e-08, equal_nan=False)
```

Returns True if two arrays are element-wise equal within a tolerance.
